Practitioner Newsletter—NZ Spring, Oct 2009

This year we celebrate 20 years of NeuroLink and development of the Neurological Integration System by Dr Allan K Phillips

## From the desk of Dr Phillips

Hawaii in 1989 became the launch pad for the NIS seminar program. I was invited to share my understanding of the neurological/physiological response to treatment using the NIS principles to a small group of doctors in Hawaii. This understanding grew to encompass research relating to learning difficulties in children and its relationship to Down's Syndrome.

### 2010 NIS Seminar Schedule

#### Introduction to NIS—Workshop

Mar 3	Auckland	New Zealand
Apr 14	Auckland	New Zealand

#### Module A Seminars

Mar 20-21	Sydney	Australia
May 15-16	Melbourne	Australia
Jun 5-6	Los Angeles	USA
Jun 12-13	London	United Kingdom
Jun 26-27	Auckland	New Zealand

#### Module B Seminars

Aug 7-8	Sydney	Australia
Aug 21-22	Auckland	New Zealand
Sept 11-12	Chicago	USA
Sept 18-19	London	United Kingdom

#### NIS Masters

TBA

#### NIS Symposium

TBA

## Introduction to NIS

If you are based in NZ and would like to learn more about NIS we have 2x Introduction Workshops scheduled for 2010.

Presented by Dr Phillips, he will address all the key questions; What is NIS?, How does it work? Why it different? What you can treat? How can my patients benefit?

If you are interested in learning NIS, but have 'burning' questions you would like answered first - we invite you to join us!

I was asked to present a paper to the South Pacific Commission conference in New Caledonia which raised several points of interest for the countries of the South Pacific region. The World Health Organization asked me to present my findings on learning difficulties to the National Council of women in Fiji and embark on a lecture series to the Medical School in Fiji. Later, travel to Japan and Guam enabled further discussion with interested government agencies.

At that time Karl Pribram MD.PhD and David Bohm PhD were considering a very different perspective in researching the holographic brain model. Through this research it became clear that our current understanding of functional neurological potential was about to change.

Through 20 years the wheel has turned to reveal that epigenetic changes in the human cell are the focus for our future. This information clarifies years of theory that we are subjects of our experiences, and our attitude to life based on those experiences. The way we approach and react to circumstances on a daily basis will in turn determine cellular changes on all levels of function.

The bottom line is whether we are able to maintain a congruent signal from the brain that enables surveillance over every cell at all times. Research at the University of Frankfurt in Germany is about to start by investigating changes to heart rate variability in children after NIS treatment.

The journey continues to open pathways of excitement and I envisage that through the next 20 years there will be a global recognition of NIS principles to accompany mainstream thinking.

Thank you for your continued support to spark awareness in a world where health is dominated and generated by medical conflict and confusion.

**Dr. Allan K Phillips, Developer of NIS**  
The NeuroLink Centre, Auckland, New Zealand

## Have you learnt the NEW NIS system?

2009 saw some huge developments/updates to the NIS seminar program taught by Neurolink®. The introduction of the NEW LOOK Neurological Integration System means that all practitioners who attended in 2009 are up-to-date with latest research.

### So where to now?

Once you have learnt the NEW LOOK NIS system (2009 Modules A & B) you can then choose to 'REFRESH' at individual Module A & B seminars.

### WHY?

At your very first Modules A and B you learnt the 'WHAT' & 'HOW' of NIS. Now when you refresh you can focus on the 'WHY'. Only by fully understanding the WHY will you be able to relate your NIS treatment findings back to the symptom patterns that your patient initially presented with - *this should be your goal with NIS.*

As your understanding of the neuro-physiology behind each protocol grows - so too will your ability to provide more details to your patients.

### WHEN?

We suggest either in the following year or over the next 2-4 years. **Don't leave it too long!** Otherwise you will miss out on new updates, & also the opportunity to confirm you are running the NIS system as well as you should/could be.

## Microchimerism & Time Cell - two new protocols making a difference

I have already used the new material on a troublesome case and the "Microchimerism" worked wonders. "Time Cell" is particularly effective as well.

The seminar was fabulous and the material is groundbreaking and truly "cutting edge." It was truly worth the investment as my patients now will be provided "world class" level care.

*Dr Randall Robirds, D.C. United States.*

**If you have not yet learnt the NEW NIS System taught in 2009  
DON'T MISS OUT!  
Check out our 2010 seminar dates and REGISTER TODAY.**

## NEW Neurolink website

Our recently launched NEW LOOK website is dual purposed:

### 1. PATIENTS

A comprehensive section dedicated specifically to helping build YOUR patients understanding of NIS. What it is, how it works, what they can expect in a treatment etc. As a busy practitioner you won't have the time to explain NIS to every patient. Use our website as your resource tool to develop their understanding.

### 2. PRACTITIONERS

In this section we have information about What NIS is? – for practitioners, along with all the information you need about the NIS seminar program. With new simple easy to use functionality, you will be able to register for seminars and purchase products easier than ever before.

Over the coming months we will be adding new NIS patient case studies and testimonials for both patients and practitioners. There will be additions to the Academy section, as we build a library of helpful case studies, from a detailed NIS perspective.

Check it out today [www.neurolinkglobal.com](http://www.neurolinkglobal.com)

Make NIS a big part of your practice. Use these steps to fast track your SUCCESS...

### STEP 1 - LEARN NIS

#### Complete Modules A & B

Module A – first half of the NIS system.

Module B – second half of the NIS system.

It is important to learn both 'halves' of the NIS system in the same year. Only then will you experience the true sustainable results achievable with NIS.

### STEP 2 – REFRESH

Both Modules A & B seminars.

### STEP 3 – JOIN THE NIS ACADEMY

#### NIS Academy 1: Proficient

To join, practitioners sit an assessment evaluating their HANDS-ON proficiency with NIS.

Members are included in the on-line Practitioner Directory, and have access to the NIS Masters presented by Dr Phillips.

### STEP 4 - ENDORSMENT

#### NIS Academy 2: Certified

When Academy 1 members have a very high level of understanding of neuro-anatomy & physiology behind the NIS system they can choose to sit certification to become endorsed by Neurolink®. Certification evaluates a practitioners PRACTICAL, CLINICAL & THEORETICAL ability with NIS.

### STEP 5 - QUALIFIED TO TEACH

#### NIS Academy 3: Trainer

Academy 2 members may like to apply for a position as an NIS trainer.

## 2010 registration savings!

When you register for a seminar **ON-LINE** in 2010 you will receive a discount off the seminar registration price!

Check out our website for more details coming soon!

## NIS Academy Update

### New Members

#### **Congratulations and Welcome!**

Over the last few months we have had a number of practitioners sit their proficiency assessment and join the NIS Academy.

The NIS Academy is a global body of healthcare practitioners committed to offering specialist healthcare to patients, utilising the Neurological Integration System (NIS) by NeuroLink.

### Practitioner Directory

As an Academy member you will now be included in our on-line Practitioner Directory. It is up to you to ACTIVATE your on-line account and to keep the details up-to-date.

**IMPORTANT NOTE:** If you have not been on-line yet and ACTIVATED your account, make sure you do **ASAP**. Otherwise your patients will not be able to find you!

### Interested in joining the NIS Academy?

If you have been using NIS for some time and would like to join the NIS Academy all you need to do is sit a Proficiency Assessment. Assessments are held in conjunction with any Module A or B seminar.

### Proficiency Assessment:

This assessment assesses a practitioners 'hands-on' ability and general understanding of the NIS system. It takes 15 minutes and is designed to be achievable for every practitioner who is using NIS confidently in practice.

*Check out the Academy Guide on our website for more information.*

## 2009 Resource Centre

If you joined us for a seminar this year you will have access to the new 2009 Resource Centre on our website.

Use this resource area as a place to get additional information to help you build an understanding of the NIS principles, and the NeuroLink® philosophy.

If you attended a seminar with us this year for the first time then check out the document '**Once you have completed Module A**'. This is a useful guide with tips on how to get started with NIS in practice.

There are suggestions on treatment times and lengths and we overview what we do here at the NeuroLink Centre - to use as a guideline.

Save the Resource Centre link to your Favorites List on your website browser for quick access. This section is not available to the general public, so you won't find it in the website sitemap.

If you have lost the link – contact us by email and we will re-send it to you: [training@neurolinkglobal.com](mailto:training@neurolinkglobal.com)

## Case Study - Dizziness caused by a virus

**Patient:** 32-yr old female

**Complaint:** 6 week history of sudden onset of dizziness. "Feels like I'm spinning around the room". No history of trauma and can't think of a reason for it. Head feels full of air, doesn't feel like a balance problem as such.

Patient had an MRINAD, Neurologist-NAD, X-rays. Was told there was "arthritis". Otherwise no specific details given on any of the findings made.

### **Treatment findings:**

#### **1st Visit:**

**Findings:** A virus in cranial nerve 5 Right. Bacterial infection (Hypothalamus), CB split (pre-motor cortex), Time Cell (Hypothalamus), DNA damage (Cerebellum, bone C1), Proteins (Hypothalamus) Core Belief (Liver) Dopamine, Serotonin, Microchimerism (Liver), Stomach (Adrenal cortex) & Mercury (Post Pituitary).

#### **2nd Visit:**

By the 2nd treatment the dizziness had dissipated, it took about 4-5 days to re-occur post treatment. Developed some cold symptoms, general joint aches including low back ache.

**Findings:** Unilateral gland (liver), Tensegrity (Left) (Tendon Right diaphragm), DNA (Tissue L4/ Cranial nerve1, Microchimerism & Mercury.

#### **3rd Visit:**

99.9% gone, only 3 episodes in the past 7 days lasting 15 seconds each.

**Findings:** DNA Damage, Microchimerism

### **Summary:**

No dizziness at all. A 100% improvement. Resolution of the Cranial Nerve virus.

**Thank you Dr Adrian Hubbard  
D.O. Australia  
NIS Academy 1 - Proficient**

*Well done  
keep up the  
good work*

**A virus in a cranial nerve can be a significant issue for many of our patients.**

**Using the NEW NIS research taught in 2009 we are now able to look more closely at this and a number of other causal issues that underpin our patients health.**

## Dr Allan K Phillips, Founder of NeuroLink

### Celebrating **20 YEARS** dedication to research and the Development of the Neurological Integration System

*Dear Dr Phillips,  
I would like to take this opportunity to express my gratitude for your passion and acknowledge all your past and current dedication and research to this remarkable tool which is NIS, providing answers and help to patients that have been 'dumped' and/or misled by the orthodox medical system.  
Didier Fouquet, NIS Academy 1 Member  
September 2009*
