

## Neurological Integration System (NIS) developed by NeuroLink

- Can you afford not to find out how one complete system will transform healthcare in your practice?
- A system that will widen the scope of your practice by giving you tools to diagnose the reasons for epidemic illness in NZ.

Developed in New Zealand by Dr Allan K Phillips, NIS is now taught internationally to practitioners who wish to offer the best healthcare possible to their patients.

This year we are fortunate to have Dr Allan Phillips, the scientific researcher behind this powerful neurological system, available to host 2x Workshops in Auckland.

**Don't miss this opportunity to personally meet Dr Phillips and find out TODAY what NIS could do for your practice TOMORROW!**

**Wednesday 3rd March  
Wednesday 14th April**

### **FREE Practitioner Introduction to NIS in Auckland**

The obvious questions will be addressed!

- What is NIS?
- How does it work?
- Why is it different?
- What can you treat?
- How will NIS benefit YOUR patients?
