

**FROM THE DESK OF DR PHILLIPS .....**  
**His own words on nutritional support**

**“Although the Neurological Integration System (NIS) developed by NeuroLink stands alone and is NOT reliant on supplementation I believe with effective nutrient support, we can assist in further promoting and sustaining wellbeing.**

**I am conscious that you may have already investigated and chosen your nutritional support program. This must be done with care as many products today have compromised on integrity and quality in favour of cost-cutting.**

**In 31 years of practice, I have drawn my own conclusions about nutrition and would like to share these with you.**

I have selected the **Oxygen Nutrition** specialised line of pure botanical formulas as my only range of choice to recommend to my patients. Why? For the simple reason that these powerful formulas represent therapeutic modalities that work! Modalities that my patients know make a difference.

What makes these products different from any others is that each of the formulas contain a proprietary enzyme delivery system to ensure that the formula will enhance metabolic processing. This is truly unique to the **Oxygen Nutrition** range.

I understand how difficult it is for anything to be assimilated completely. Good ingredients within a nutritional supplement are one thing but whether your body is able to use those ingredients is another! Most supplements and vitamins fast track to the toilet because of their limited ability to breakdown to a point they can be utilised at cellular level. I have seen many cans of whole tablets in the small intestine !!

I am excited to be able to share and submit for your scrutiny a small specialised range of nutritional support that is ahead of its time. This development is attributed to the intimate understanding of cellular physiology by the biosynthesist Dr Tony Escobar. These are formulas that truly give results.”

**Allan K. Phillips, D.O.**  
**FOUNDER & DIRECTOR, NEUROLINK**

Total Health Solutions (THS) represents a unique and powerful range of nutritional formulas developed by Oxygen Nutrition Co in the USA. These formulas are quite different to any vitamins, herbs or minerals you may have taken in the past.

Oxygen Nutrition formulas have been designed with our intricate biochemistry in mind, so that we are able to KNOW that they are working, not just HOPE.

This range is the only range of nutritional formulas endorsed by MEDICAL DOCTORS.

## What makes this range different from other nutritional supplements?

### i.) **Enzyme Transport System – Unique to these formulas!**

Each formula contains a special proprietary enzyme delivery system. This means that it works by getting the ingredients to the body quickly, in a recipe that the body can use and not eliminate, so there is no wastage.

#### **How does it work?**

Each of these 4 processes MUST take place to ensure that we are able to fully assimilate any nutritional supplements:

**DIGESTION / METABOLISM / ASSIMILATION / ABSORPTION**

At each of these stages thousands of enzyme functions need to take place.

Sometimes we are deficient at one, or more of these stages.

Oxygen Nutrition puts these live enzymes into each formula to ensure that we are able to use EVERY capsule EVERY time.

### ii.) **Best live plants and botanicals used**

Sourced from around the world All completely natural ingredients means that they work more effectively and quickly than other supplements which can contain binders, yeasts, and fillers.

### iii.) **Developed by a Bio-synthesist in the USA – not a herbalist**

The formulas have ingredients that are specially designed that to 'work harmoniously together'. It is essential for successful assimilation that one helps the other to be more effective.

# Facts you should know about nutritional supplements

## WHY CAN'T I GET ALL MY NUTRITIONAL NEEDS THROUGH FOOD?

In today's world the nutrient value in food is very poor. Pollution and poor care of our environment contribute to this. We would need to eat a lot more than our regular quantities to get all the nutrients we need.

The vitamin and mineral uptake the body requires come from a much wider variety of food than what we eat and/or is available to us. Some of the important nutrients are not even present in the diet of the average New Zealander.

## DO GOOD INGREDIENTS ALONE MAKE A GOOD NUTRITIONAL SUPPLEMENT?

Do you know, it is not enough just to have good ingredients in a product? No matter how good the individual ingredients are, they may not be able to be used by your body.

What that means, is that much of the tablet or capsule will be eliminated by your body. Why is that? It takes a lot for something to penetrate through the cell walls of the body and for everything in a capsule/tablet to be absorbed by your system.

The 'recipe' of a nutritional supplement must contain ingredients that are known to be compatible together, and also contain a system of enzymes that will ensure everything can be absorbed by the body. There are not many nutritional supplements on the market that meet that criteria.

## WHICH IS MOST EFFECTIVE – TABLETS OR CAPSULES?

Capsules are more effective than tablets, but not all capsules are effective. In order to make a tablet, it has to be baked, similar to a cake. This involves heat, which means many of the nutrients are destroyed. This is the same as over-steaming your vegetables in the pot. The more heat they receive, the less nutrient value they have. Also.....in order to make the ingredients bind together to form a tablet, additional filler ingredients must be added.

These ingredients are not always safe and do not have any nutritional value.

## WHAT ARE THE MOST EFFECTIVE INGREDIENTS IN NUTRITIONAL SUPPLEMENTS?

Pure herbs & botanicals. These contain very important live enzymes. If a product contains something that has already been synthesized or gone through some additional manufactured process, it will not be able to be absorbed by your body. This means you will eliminate much of the product and you will not receive as much benefit. The most effective nutritional supplements should be termed as 'food', with not fillers, binders, artificial ingredients, yeasts or residues.

# Oxygen Nutrition Co. formulas supported by Total Health Solutions...

## HOW TO PURCHASE OXYGEN NUTRITION FORMULAS:

These days it is difficult to get all the nutrients that we need from food. Effective nutrient support should not only aid in the healing and recovery process, but assist in further promoting and sustaining well-being.

This range of formulas has been 100% endorsed by a board of medical doctors in the USA and is supported by NeuroLink because they work well in conjunction with an NIS treatment.

## Order today:

To order just visit the shopping section of the NeuroLink website [www.neurolinkglobal.com](http://www.neurolinkglobal.com). All prices are in NZ\$ & are shipped from New Zealand.

## Wholesale option:

If you are a New Zealand or Australian healthcare provider interested in re-selling this range of formula's to your patients please contact Total Health Solutions directly from New Zealand on **09 522 8730** or Australia (toll free) **1-800 126 748** to sign-up today.

The following are just some of the complaints these formulas can be used for:

### TriGuard Plus Natural Antibiotic

Virus, Bacteria, Fungal, Protozoa  
Chronic fatigue  
Camping, Drinking water  
Eczema, Warts  
Athletes foot  
Steriliser  
Candida

### Pronog Antioxidant Antioxidant Formula

Protector from 'free radicals'  
Anaesthetic, Circulation, eyesight  
Colds, Influenza, Congestion  
Healthy blood/ heart, immune system  
Inflammation, Rheumatism  
Skin complaints

### Awakening Energy Formula

Athletes & runners  
Asthma  
Depression, Fatigue, Stress  
Inflammation  
Menstrual pain  
Natural cleanser  
Thyroid problems  
Weight management

### Silicosamine Joint Formula

Allergies  
Athletes  
Beauty  
Fibromyalgia  
Gout, Inflammation  
Healing, Joint trauma  
Joint diseases & degeneration  
Osteoporosis, Arthritis

### Bone Plants Osteo Formula

Arthritis  
Beauty  
Fractures, healing, recovery  
HRT & PMT  
Hypertension  
Osteoporosis, Rheumatism
