

PRACTITIONERS GUIDE FOR PROFICIENCY TESTING TO QUALIFY FOR NIS ACADEMY MEMBERSHIP

This outline is to enable a practitioner at Module A and B level, to proceed to the Masters program with a level of comfort and competency.

Muscle testing is an essential ingredient, and this will be assessed during the testing process.

Without reference to NIS literature, one is expected to identify with the following;

1.
Body contact points /pulses that specifically identify with the glandular system
2.
Spinal segmentation and their nerve reference to each gland.
3.
Basic muscles represented by each gland.
4.
Basic physiological functions of the glands
5.
Symptoms arising when a specific cranial nerve is dysfunctional
6.
Structural implications arising from a weakened muscle.
